Feedback from iPad Review Forum

iTunes U has helped me be organised and on task by telling me what our timetable and what is coming up next.

Love how the apps talk to each other. Create one professional finished product.

They help explain things further, assist with research and literature.

I like the way the kids have to plan their projects with story, pictures & sound.

Love how kids taught to be independent. Work through process independently.

Great way of presenting information neatly, especially for boys!

I like the ways the kids can express their individuality.

Like how task cards-shows teachers have considered how task fits with SAMR and Blooms.

Loved narrative planning on poppet and drawing pad, it is fun and helpful.

Wish I knew how to use these apps. Would be useful tools for me too.

I love the way you can have text, illustrations and sound.

You can research very easily. Create some great work, that looks very professional.

The iTunes U narrative course helped me keep track of what I had to do.

I am concerned about handwriting skills.

We love that you are able to create, research and get feedback all in one place and that these things are easily integrated.

It's such a fun way to learn.

The range of apps used is a positive, as it allows the kids to be so creative and resourceful.

Like task cards that clearly lay out what they need to do.

Book creator helps me write more fluently and helps me get my ideas out quickly.

iTunes U helps me to remember to do my homework.

I liked to see if the teacher agrees with me on my self-assessment rubric.

As a mum my head is spinning with all this great work. It looks so good.

I wish we could have an iPad free day where we don't use the iPad.

Making the book in book creator allowed me to add pictures and media to make my book more interesting.

It provides a modern day option to be creative and explore their imagination.

Using the iPad has helped the kids to learn in different ways and to type better.

Writing on the book was really cool and I enjoyed it a lot.

I wish we could spend more time to learn how to use more functions on the book creator app.

Helps creativity.

I also think it's easier to type on a computer keyboard than an iPad keyboard.

I'd like to improve my spelling and use more descriptive.

Popplet is a really good way to summarise information in your own words in a specific and clear format.

That the actual narrative should be the same as your plan.

Helpful for research.

Easier to be creative than on the computer.
I wish we could spend more time using the app explain everything
iTunes U sets out very clear instructions and you can refer back at all times to keep on track
Fun way to learn when doing maths, spelling, English and geography
Has been an easy transition and kids seem to be picking up new app use really well
I think we should use the app duo lingo the language app
Like how we can use a wide variety of apps.
More teacher feedback and input with editing work
I like using the iPads
Planning was the most interesting and fun
I would like to improve on my maths and be more persuasive in my text
I like using educational apps
I think we should focus more on the apps
I like using the iPad to be creative as well as to do my work on it
Work is trackable and parents can see what has or has not been done by the child (especially homework)
iTunes U is easy to reach all tasks that teachers have set.
I would like to know more about the apps so I understand what they are doing
Showbie is great to see what the teacher says about the child's work
